

Design Bees · designbees.com.au — SEO & AI visibility snapshot

Four free audits + Google Search Console, read separately: **SEO scores** (site health) · **AI mentions** (answer engines) · **Google AI impressions** (Search Console). Facts are tagged **ACTUAL**, opinions **RECOMMENDATION**, gaps **MISSING**. Prepared 10 Sep 2026 · Draft v1
Site: Wix Studio, 38 pages + 23 posts (sitemap, 10 Sep)
Pending: Peekaboo run · GSC Generative AI export

1 · **SEO scores** **ACTUAL**

Semrush SEO Checker · 10 Sep 2026 · run by AJ · [semrush.com/free-tools/seo-checker](#)
50 / 100 SEO score (homepage).
Flagged: **Interaction to Next Paint** and **Total Blocking Time** fail Google's targets; mobile-friendliness and DOM size could not be measured; images missing alt text; title 61 characters; no Instagram or X links; authority, backlinks and referring domains below the compared sites (top links are DesignRush directory pages and a Behance profile). Passed: sitemap, robots, canonical, structured data (FAQPage, ProfessionalService), LCP, CLS, TTFB, FCP, H1.
Ahrefs Site Audit · 9 Sep 2026 · alert email · [app.ahrefs.com](#)
Health **93 / 100**, but only **3 URLs crawled** (free tier). 1 error: HTTPS page links to HTTP. Warnings: redirect chain, 2 × 3XX redirects.
Search Console alerts · 17 Aug and 9 Sep 2026 · [sc-noreply@google.com](#)
Product snippets: missing *review*, *aggregateRating*, *availability*. Merchant listings: 4 missing offer fields. New indexing reason "Alternate page with proper canonical tag".

2 · **AI mentions** **ACTUAL**

HubSpot AI Search Grader · 10 Sep 2026 · inputs: Design Bees, Australia, unlimited graphic design subscription, marketing & advertising · [result link](#)

ENGINE	SCORE	RECOGNITION	SHARE OF VOICE	SENTIMENT
ChatGPT	43	4 / 20	0 / 10	27 / 40
Perplexity	51	5 / 20	4 / 10	32 / 40
Gemini	44	3 / 20	0 / 10	31 / 40

Scores out of 100. Sentiment is the only strong dimension; presence quality 5–7 / 20. Full report sits behind a HubSpot form.

Semrush AI Visibility Checker · 10 Sep 2026 · run by AJ · [semrush.com/free-tools/ai-search-visibility-checker](#)
AI Visibility Score **0 (Low)**. Mentions **2**, both in Google AI Mode (ChatGPT 0, Gemini 0, AI Overviews 0). Citations **4**: pricing-guide post ×2, homepage ×1, how-it-works ×1. Audience reach 458. The two topics it surfaced for are off-target ("unlimited design and decor services", "custom t-shirt design"). Trend needs more history; the 0 itself is a real reading.
Semrush SEO Dashboard → AI Search · logged in, Australia scope · 10 Sep 2026: AI Visibility **14**, mentions **1** (Gemini), cited pages **9** (ChatGPT 7, Gemini 2, AI Overview 1, AI Mode 1). Different prompt sample from the free checker; both say near-zero mentions with a few citations.
Peekaboo · 10 Sep 2026 · [aipeekaboo.com](#) **MISSING**
Onboarding ran to step 4 of 5 (auto-suggested prompts) and then required "Create free account & run it". Needs AJ to sign up and run; results to be added.
SearchAtlas LLM Visibility · 31 Aug 2026 · weekly email **SECONDARY**
4 pages newly cited by AI; */design-solutions/graphic-design-sydney* 13 mentions.

3 · **Google AI impressions** **ACTUAL**

Performance → Generative AI (AI Overviews + AI Mode) **MISSING**
Not yet received. Needs an export from the *designbees.com.au* domain property, last 3 months, date range visible. The account requires AJ's login.
Performance → Search results · Google monthly performance emails 7 Jul, 4 Aug, 8 Sep 2026 · [Search Console property](#)

MONTH	CLICKS	IMPRESSIONS	NEW PAGES*
June 2026	253	18.4K	19
July 2026	328	24.4K	3
August 2026	299	21.3K	9

*pages with first impressions, Google estimate. These totals fold AI-feature impressions into web search; they are not the Generative AI report.

August top pages: pricing-guide post 121 clicks, homepage 85, logo & branding package 33. Top queries: "design bees" 36, "designbees" 11, "freelance graphic designer hourly rate australia" 2. Growing: "cheap branding packages", "graphic designer cost". 84% of clicks from Australia, 29% on mobile.

3-month baseline · GSC review sheet, 3 Jun 2026: 714 clicks, 53.1K impressions, CTR 1.3%, avg position 12.5. "graphic design services" 2,106 impressions at 0% CTR, position 10.6; "unlimited graphic design" 381, position 31; "graphic design subscription" 191, position 13.

Top three priorities **RECOMMENDATION**

- 1 Turn head-term impressions into clicks. "graphic design services" earns 2,106 impressions a quarter on page 1 with 0% CTR; "unlimited graphic design" sits at position 31. Clicks today are brand-led ("design bees" 36 of the top 49 in August). Rewrite the title, meta and first 100 words of the homepage and */design-solutions/graphic-design* as direct answers with the \$545 price, then read CTR in Search Console after four weeks.
Why: it is the largest volume on the site with the least return, and it needs no new pages.
- 2 Clear the technical flags all three tools agree on. Fix the Product-snippet and Merchant-listing schema fields Google flagged on 9 Sep (pricing and package pages), the HTTP internal link and redirect chain from Ahrefs, the missing image alt text, and the INP / Total Blocking Time failures (audit which Wix apps and scripts load on every page; Wix Hotels is installed and unused).
Why: schema on the pricing pages is what rich results and AI engines read, and those are already the most-cited pages. INP failing hits the 29% of clicks that are mobile.
- 3 Close the AI-visibility gap off-site. Semrush AI score 0 and HubSpot share of voice 0 / 10 on ChatGPT and Gemini say the engines are not choosing Design Bees for category prompts. Publish the Design Pickle alternative page, claim Clutch, G2 and DesignRush profiles, and collect five client reviews there.
Why: the June audit found ChatGPT recommending ManyPixels, Penji and Kimp for "best unlimited graphic design subscription in Australia"; answer engines cite review sites and comparison lists, and this was the #1 gap on the 24 Jul checklist and is still open.

Five customer queries to target **RECOMMENDATION**

CUSTOMER QUERY	EVIDENCE (ACTUAL)	BEST PAGE	STATUS
Best unlimited graphic design subscription in Australia	Perplexity and Google AI Overview name Design Bees first; ChatGPT omits it (AEO audit, 3 Jun). "best unlimited graphic design service" 53 impressions, position 28 (GSC, 3 Jun).	/post/top-7-design-subscriptions-for-creative-teams-2026	Existing
How much does unlimited graphic design cost in Australia	Top page in August (121 clicks); most-cited page in Semrush AI (2 citations) and cited by Google AI Overview and ChatGPT with the correct \$545–\$2,645 range.	/post/graphic-design-costs-in-australia-your-pricing-guide	Existing
Graphic design services (Australia)	2,106 + 373 impressions a quarter, page 1, 0–0.3% CTR (GSC, 3 Jun). Homepage owns the head term in the site's keyword map.	/ (homepage)	Existing
Graphic design services Sydney	City page cited 13 times by AI engines (SearchAtlas, 31 Aug). Returned HTTP 502 once on 10 Sep, then 200; worth watching.	/design-solutions/graphic-design-sydney	Existing
Design Pickle alternative Australia	All three engines answer "Design Bees vs Design Pickle" (3 Jun audit); no page targets the "alternative" query and the URL is a 404 (checked 10 Sep). P2 on the 24 Jul checklist.	/design-pickle-alternative-australia	Proposed new page

Next actions **RECOMMENDATION**

- ☐ **AJ:** create the free Peekaboo account, run the Design Bees report, send the results (screenshots or pasted text).
- ☐ Fix the Product-snippet and Merchant-listing schema fields on pricing and package pages; re-validate in the Rich Results Test; request re-indexing.
- ☐ Rewrite homepage and */design-solutions/graphic-design* title, meta and opening for "graphic design services" and "unlimited graphic design australia".
- ☐ Publish */design-pickle-alternative-australia* and the drafted "temporary graphic designer cover" page (in the repo, not live).
- ☐ Unpublish the placeholder post */post/your-title-what-s-your-blog-about* (still in the sitemap on 10 Sep).
- ☐ **AJ:** export Search Console Performance → Generative AI and → Search results, last 3 months, to Google Sheets in Drive.
- ☐ Fix the HTTP internal link and the redirect chain Ahrefs flagged; add alt text to the images Semrush flagged.
- ☐ Cut homepage JavaScript: remove unused Wix apps, defer chat and third-party scripts; re-test INP and TBT.
- ☐ Claim Clutch, G2 and DesignRush profiles; ask five clients for reviews; add Instagram and X links to the site footer.
- ☐ Re-run these four tools and the two Search Console reports in 30 days with the same inputs and compare.
