

Design Bees Visibility Report

Four free audits, Google Search Console and their supporting data, read as three separate things that are often blurred together: **SEO scores** (site health), **AI mentions** (what answer engines say), and **Google AI impressions** (Search Console's own report). Each finding carries its source and date. Recommendations are labelled as such.

Site	Version	Prepared for
designbees.com.au · Wix Studio · 38 pages + 23 posts (sitemap, 10 Sep)	Draft v6 · full detail · 10–11 Sep 2026	AJ Kavanagh, Design Bees
Still pending Nothing. Four tools, both Search Console exports and live engine checks are all in.		

Labels: **ACTUAL** measured result **RECOMMENDATION** my opinion **MISSING** could not be obtained **SECONDARY** older or third-party monitoring, used as context

1 · Summary ACTUAL

SEO scores · site health

50 / 100

Semrush SEO Checker, homepage, 10 Sep 2026 (run by AJ)

- Sub-scores: on-page 60%, technical 80%, off-page 0%, social 60%. 11 critical and 3 minor issues.
- Fails: Interaction to Next Paint 6.19 s, Total Blocking Time 1.07 s (performance score 56/100), image alt text, Instagram and X links, authority/backlinks/referring domains versus compared sites.
- Could not measure: mobile-friendliness, DOM size.
- Passes: sitemap, robots, canonical, H1, structured data (FAQPage, ProfessionalService), LCP, CLS, TTFB, FCP.
- Ahrefs, 9 Sep: health 93 on only 3 crawled URLs; 1 error (HTTPS page links to HTTP), a redirect chain.
- Search Console, 9 Sep: Product-snippet and Merchant-listing schema warnings on the site.

AI mentions · answer engines

56 / 100

Peekaboo visibility · 5 Australian prompts × 4 engines · 40 runs · 10 Sep 2026

- Ahead of every tracked competitor on the same day: ManyPixels 23, Penji 19, Design Pickle 17, Kimp 10.
- By engine: Perplexity 68, Google AI Overview 60, Gemini 49, ChatGPT 46. Google AI Mode was not sampled.
- But **0 mentions in 8 runs** for the unbranded prompt "what do small businesses typically switch to when their freelance designer becomes too costly?", and 0 on both ChatGPT and Gemini for "graphic design services (Australia)".
- HubSpot AI Search Grader: 43 ChatGPT · 51 Perplexity · 44 Gemini, share of voice 0/10 on ChatGPT and Gemini, sentiment the only strong dimension.
- Live check, 11 Sep, from an Australian connection: Google AI Mode names Design Bees in **6 of 6** buyer queries and ChatGPT in **5 of 6**, in both cases ranking it first or near-first on the commercial ones. The one miss is ChatGPT on "what do small businesses switch to when a freelance designer gets too costly", where it names no provider at all.
- Semrush AI Visibility Checker: score **0**, 2 mentions, 4 citations;

Google AI impressions

· Search Console

7,865

Impressions in Google AI features (AI Overviews + AI Mode), 9 Jun – 8 Sep 2026, Search Console Generative AI export

- June (from the 9th) 1,214 → July 3,395 → August 2,568 → 1–8 Sep 688. Peak week: 20 Jul, 1,000. Last 28 days 2,291, down 23% on the 28 before.
- Three pages carry 82%: pricing-guide post 4,156, homepage 1,772, logo & branding package 1,166. Desktop 86%, Australia 87%.
- Roughly 12–14% of the site's web impressions (July 24.4K, August 21.3K) came through AI features. The export reports impressions only, no clicks and no queries.
- Search results, same 92 days (export): 930 clicks, 65.5K impressions, CTR 1.4%. "graphic design services" now position 4.6 with 1,787 impressions and 0.22% CTR; "graphic design services sydney" position 2.1, 122 impressions, 0 clicks. Product-snippet rich results carried 13.4K impressions and 110 clicks.

Semrush dashboard
(Australia) 14, 1 mention, 9
cited pages. The tools
disagree because they ask
different questions:
Appendix D5 reconciles
them.

The one-line read. The site is technically sound at the crawl level and has a strong pricing page, but it earns clicks almost only on its own name: the biggest non-brand terms now sit at positions 2 to 5 with almost no clicks, and page speed on interaction fails. On AI visibility the picture is more specific than "invisible": when the question names Australia, Peekaboo has Design Bees ahead of all four subscription competitors, and Google's own AI features showed the site 7,865 times in three months. Live checks on 11 September confirm it: Google AI Mode names Design Bees in all six buyer queries and ChatGPT in five, usually first. The one gap is the unbranded question about a freelancer becoming too costly, which ChatGPT, Gemini, Perplexity and AI Overview answer without naming any provider at all; Google AI Mode answers it largely from the Design Bees site.

2 · Top three priorities RECOMMENDATION

Turn head-term impressions into clicks

"graphic design services" earned 1,787 impressions in the last three months at position 4.6 with 0.22% CTR (it was position 10.6 in June, so the ranking work has landed and the snippet has not); "graphic design services sydney" sits at position 2.1 with 122 impressions and no clicks; "brand design" 1,277 impressions at position 17.5. Clicks are brand-led: 212 of the 329 clicks in the queries export are the brand name. Rewrite the title, meta description and first 100 words of the homepage and of /design-solutions/graphic-design as direct answers with the \$545 entry price, then read CTR in Search Console after four weeks. The homepage and pricing guide already carry 68% of the site's Google AI-feature impressions, so a sharper answer on them is read by AI Overviews as well.

Why it matters: it is the largest volume on the site with the least return, and it needs no new pages. Semrush already flags the homepage title (61 characters) and meta description (149 characters) as over length.

Clear the technical flags the tools agree on

Fix the Product-snippet and Merchant-listing schema fields Google flagged on 9 Sep (missing *review*, *aggregateRating*, *availability*, return policy, shipping, identifier), the HTTP internal link and redirect chain from Ahrefs, the missing image alt text, and the Interaction to Next Paint (6.19 s) and Total Blocking Time (1.07 s) failures (audit which Wix apps and scripts load on every page; Wix Hotels and Wix Chat are installed).

Why it matters: schema on the pricing and package pages is what both rich results and AI engines read, and those are already the most-cited pages. INP failing hits the 29% of August clicks that were mobile.

Close the gap where the engines still don't pick you

Peekaboo puts Design Bees at 56, ahead of ManyPixels, Penji, Design Pickle and Kimp, so the brand is not invisible. The gap is specific: **0 mentions in 8 runs** on the unbranded "freelancer got too costly" prompt, and **0 on both ChatGPT and Gemini** for "graphic design services (Australia)" where Google AI Overview scores 100. The engines build those answers from other companies' comparison posts: manypixels.co (27 citations), reelunlimited.com.au (22), flocksy.com (21), digitalpolo.com (18), graphiker.com.au (18), reddit.com (16), sourceforge.net (11), g2.com (3). Publish the Design Pickle alternative and freelancer-replacement pages, get listed on the directories that accept submissions, and claim G2 and Clutch.

Why it matters: the June audit found ChatGPT recommending ManyPixels, Penji and Kimp for this exact category, and Peekaboo now shows the mechanism: ChatGPT reaches those names through those companies' own listicles. Two of the five prompts a buyer would actually type return nothing. This was the #1 gap on the 24 July checklist and is still open.

3 · Five customer queries to target RECOMMENDATION

Questions a buyer asks before they know the brand name, each mapped to the page that should answer it. Evidence is actual; the mapping is my call.

CUSTOMER QUERY	PEEKABOO SCORE	EVIDENCE (ACTUAL)	BEST PAGE	STATUS
Best unlimited graphic design subscription in Australia	88	Peekaboo 88 of 100 over 8 runs (10 Sep). Perplexity and Google AI Overview name Design Bees first; ChatGPT omits it (AI-engine audit, 3 Jun). "best unlimited graphic design subscription services australia": 32 impressions at position 1.9 and "best unlimited graphic design service": 33 at position 14.2, both 0 clicks (Search Console export, 9 Jun – 8 Sep). The Top 7 post ranked #1 for "best design subscription australia" on 3 Jul.	/post/top-7-design-subscriptions-for-creative-teams-2026	Existing
How much does unlimited graphic design cost in Australia?	100	Peekaboo 100 of 100 over 8 runs, the strongest prompt measured (10 Sep). Top page over three months (328 clicks, 16.1K impressions, CTR 2.0%, position 8.2); "how much does a graphic designer cost" position 1.7 and "graphic designer cost" position 1.2 (export); most-cited page in Semrush AI Visibility (2 of 4 citations); cited by Google AI Overview and ChatGPT with the correct \$545–\$2,645 range (3 Jun).	/post/graphic-design-costs-in-australia-your-pricing-guide	Existing
Graphic design services (Australia)	40	Peekaboo 40: Google AI Overview 100 at position 1 and Perplexity 60, but ChatGPT 0 and Gemini 0 (10 Sep). 1,787 + 365 impressions in the last three months at positions 4.6 and 3.6, CTR 0.22% and 0.27% (Search Console export); in June it was position 10.6. The homepage owns the head term in the site's own keyword map.	/ (homepage)	Existing

CUSTOMER QUERY	PEEKABOO SCORE	EVIDENCE (ACTUAL)	BEST PAGE	STATUS
Graphic design services Sydney	not tracked	Not among the five prompts Peekaboo runs; worth adding. City page cited 13 times by AI engines (SearchAtlas, 31 Aug) and twice by Perplexity in the Peekaboo run. Search Console export: "graphic design services sydney" 122 impressions at position 2.1 with 0 clicks, "graphic design sydney" 68 at 7.3; the page itself 373 impressions, 5 clicks, average position 30.8. The page returned HTTP 502 once on 10 Sep and 200 on two rechecks; worth watching.	/design-solutions/graphic-design-sydney	Existing
Design Pickle alternative Australia	51	Peekaboo 51 over 8 runs (10 Sep), reached mostly through other companies' listicles rather than a Design Bees page. "design bees vs penji vs design pickle for small teams" appears in Search Console (12 impressions, position 9.6). All three engines answered "Design Bees vs Design Pickle" in June, but no page targets the "alternative" query; the URL is a 404 (checked 10 Sep). P2 on the 24 Jul checklist.	/design-pickle-alternative-australia	Proposed new page

CUSTOMER QUERY	PEEKABOO SCORE	EVIDENCE (ACTUAL)	BEST PAGE	STATUS
What do small businesses switch to when a freelance designer gets too costly?	0	Peekaboo 0 mentions in 8 runs , across ChatGPT, Gemini, Perplexity and Google AI Overview alike (10 Sep), and absent on ChatGPT in 2 of 2 verified live runs. But Google AI Mode names Design Bees and cites the site more than any other source (Appendix J4), an engine Peekaboo never sampled. So the content works and the gap is reach, not absence. This is the closest of the six to how a buyer describes the problem before knowing the category. Search Console already shows this framing: "graphic design subscription service vs hiring a local australian designer (for australia)" 39 impressions at position 1.1 and "freelance graphic designer vs graphic design agency in australia, which is better (for australia)" 26 at position 1.0, both 0 clicks.	/temporary-graphic-designer-cover-australia	Proposed new page

The sixth row is Peekaboo's own discovery prompt. The drafted "Temporary graphic designer cover in Australia" page (slug temporary-graphic-designer-cover-australia, 404 on 10 Sep) is the natural home for it; the July checklist calls it the one topic with rising demand that matches closed deals.

4 • Next actions RECOMMENDATION

- ☐ AJ In Peekaboo, swap or supplement the tracked competitors: it watches the US brands (Design Pickle, ManyPixels, Penji, Kimp) while the engines actually cite the Australian ones (Reel Unlimited, Graphiker, Lumin). Add the Sydney and freelancer-replacement prompts too.

☐ Miguel Check the http://www.designbees.com.au/ redirect and the homepage canonical: Search Console records the http URL as a separate page with 10.6K impressions and 57 clicks in three months (position 5.4), alongside the https homepage.
- ☐ AJ / Claude Rewrite the Sydney page title and meta as a click-worthy answer: it ranks at position 2.1 for "graphic design services sydney" with 0 clicks from 122 impressions.

☐ Miguel Watch the four retired vertical pages and the http:// homepage variant in the Generative AI pages report; their 301s are in place (checked 10 Sep), so the impressions Google still credits to them should fade. If they persist past 30 days, resubmit the sitemap and request indexing of the canonical URLs.
- ☐ Miguel Fix the Product-snippet and Merchant-listing schema fields on the pricing and package

☐ Miguel Fix the HTTP internal link and the redirect chain Ahrefs flagged; add alt text to the images

pages; validate in the Rich Results Test; request re-indexing in Search Console.

- ☐ AJ / Claude Rewrite the homepage and /design-solutions/graphic-design title, meta and opening for "graphic design services" and "unlimited graphic design australia"; title under 60 characters, meta under 155.
-

- ☐ AJ / Claude Publish /design-pickle-alternative-australia and the drafted temporary-designer-cover page.
-

- ☐ Miguel Unpublish the placeholder post /post/your-title-what-s-your-blog-about (still live and in the sitemap on 10 Sep).
-

- ☐ AJ / Claude Re-run the four tools and the two Search Console reports in 30 days with the same inputs and compare against this report.
-

- ☐ AJ Claim the Clutch profile. Both engines cite Clutch directory pages ahead of vendor sites for "graphic design services Australia".
-

Semrush flagged.

- ☐ Miguel Cut homepage JavaScript: remove unused Wix apps (Hotels is installed), defer chat and third-party scripts; re-test INP and TBT.
-

- ☐ AJ Claim Clutch, G2 and DesignRush profiles; ask five clients for reviews there; add Instagram and X links to the site footer.
-

- ☐ Miguel Decide the fate of the three thin pages still indexable: /design-subscriptions-for-construction, /design-subscriptions-for-manufacturing, /options-to-scale-design (about 230 words each, no schema). Build them out or noindex them.
-

- ☐ AJ Claim and complete the Google Business Profile listing. Both ChatGPT and AI Mode answer the Australia and Sydney queries from the map pack, it is why ChatGPT ranks Design Bees top on the head term, and both displayed the profile as "Closed" when asked.
-

- ☐ AJ / Claude Own the freelancer-cost question. No provider is named by any engine for it, so it is uncontested rather than lost. Rework /post/cannot-afford-a-full-time-designer-here-are-your-options to answer it directly, or fold it into the proposed /temporary-graphic-designer-cover-australia page. Also strengthen /post/are-unlimited-graphic-design-services-truly-limitless-what-you-need-to-know, which ChatGPT cited in all four verified runs and which Peekaboo never saw.
-

Appendix A · Semrush SEO Checker

SEO SCORES

ACTUAL

Tool: semrush.com/free-tools/seo-checker · input designbees.com.au (homepage) · run by AJ on 10 Sep 2026 in a logged-in Semrush account · result pasted as text by AJ (report page).
The free checker uses Semrush's US keyword database for its rankings and competitor sections.

Score and issue list

SEO Score 50 / 100. Semrush counts 11 critical and 3 minor issues. Sub-scores: On-Page SEO 60%, Technical SEO 80%, Off-Page SEO 0%, Social Media 60%.

TYPE	CHECK	STATUS	SEMRUSH'S NOTE
Page speed	DOM size	Not measured	Unable to retrieve the DOM size metric; the page may be inaccessible or the API unavailable.
Page speed	Total Blocking Time	Fail	Heavy scripts severely delay user input. Break up long tasks, lazy-load non-essential code, reduce third-party scripts.
Page speed	Interaction to Next Paint	Fail	Clicks and taps feel noticeably delayed. Defer non-critical JavaScript, move work off the main thread, reduce third-party script impact.
Page speed	Mobile friendliness	Not measured	Failed to check mobile friendliness; the page may be inaccessible or the API unavailable.
Social media	X (Twitter)	Fail	No link to an X profile found on the page.
Social media	Instagram	Fail	No link to an Instagram page found on the page.
Off-page	Referring domains	Fail	Referring-domain count well below the compared sites. Prioritise link-building, digital PR and content promotion.
Off-page	Backlinks	Fail	Backlink total well below the compared sites.
Off-page	Authority Score	Fail	Authority Score well below the compared sites.
On-page	Image alt	Fail	Some images are missing alt text.

On-page checks (homepage)

CHECK	STATUS	DETAIL
URL	Pass	21 characters, www.designbees.com.au
Title	Warning	61 characters, aim for 50–60: "Unlimited Graphic Design Subscription Australia Design Bees"
Meta description	Fail	149 characters, Semrush suggests 100–130: "Get unlimited graphic design from Design Bees, an Australian company. Packages start at \$545/month with a 10-day free trial. Pause or cancel anytime."
H1	Pass	Single H1, 68 characters: "Unlimited Graphic Design for Australian Businesses – From \$545/Month"
H2–H3 structure	Pass	18 H2, 3 H3, no H4–H6. H2s: Trusted By Australian Brands · How It Works · See How Our Design Subscription Works in Minutes · Why Australian Businesses Choose Us · Proudly Australian · Unlimited Requests & Revisions · Quality Control on Designs · Dedicated Designer · Instant Access to Top-Tier Creatives · Graphic Design & Illustrations · Presentations & Pitch Decks · Video Editing & Motion Graphics · And More! · Check Out Our Work · Australian Businesses & How They Use Us · All Plans Include · Unsure which plan best suits your business? · Have more questions? H3s: Unlimited Queue & Revisions · Monthly Packages · No contracts. Only one H2 contains "graphic design".
Image alt	Fail	Some images missing alt text
Content	Pass	Text-to-code ratio 53.82% (pass). Semrush counts 20,439 words, but its word list includes code tokens such as "pagehtmlbeds" and "polyfills", so it is reading embedded script as text; the live page carries about 1,750 visible words (10 Sep fetch).
Keyword density	Pass	"design" 44 (2.68%), "case" 36, "study" 36, "view" 36 (2.19% each), "plan" 17, "marketing" 16, "bees" 13, "hours" 12, "free", "start", "work" 11, "cancel", "trial", "unlimited" 10, "brand", "designer" 9. "graphic" appears only 5 times (0.30%) and "subscription" 5. The case-study carousel ("case study", "view") dominates the counted text.
Keyword rankings	—	US database: "graphic design australia" (volume 40, difficulty 21, 0% of traffic) and "80 graphics australia services products" (volume 50, difficulty 37, 0%, listed twice). Not Australian search data.
Top pages	—	Homepage only: 0% traffic share, 3 keywords, 30 referring domains, 158 backlinks (Semrush page-level data, which contradicts the N/A in the off-page section below).

Technical checks

Page speed and Core Web Vitals

METRIC	STATUS	SEMRUSH 'S NOTE
Performance score	Partial	"Performs reasonably well but doesn't fully meet Google's targets": compress large images, remove unused CSS/JavaScript, enable caching. Score 56 / 100 .
Mobile friendliness	Not measured	Failed to check
Largest Contentful Paint	Pass	LCP 1.7 s
Interaction to Next Paint	Fail	INP 6.186 s . Google's "good" threshold is 0.2 s; this is 30 times over it.
Cumulative Layout Shift	Pass	CLS 0.0
Time to First Byte	Pass	TTFB 0.111 s
First Contentful Paint	Pass	FCP 0.8 s
Speed Index	Pass	Speed Index 3.3 s
Total Blocking Time	Fail	TBT 1.065 s . Google's "good" threshold is 0.2 s.
DOM size	Not measured	Unable to retrieve

Competitors, off-page and social

- **Competitors listed** (one common keyword each, US database): graphicdesignacademy.com.au 27% competition level, australianlogodesign.com.au 21%, goldcoastgraphicdesigncompany.com.au 19%, ccgraphicdesignsau.com 3%, clutch.co 0%. These are keyword-overlap neighbours, not the subscription competitors (Design Pickle, ManyPixels, Penji, Kimp).

- **Off-page assessment:** Authority Score N/A, backlinks N/A, referring domains N/A, nofollow vs dofollow N/A. Semrush had no aggregate link data for the domain, which is itself the finding.
- **Top backlinks shown:** one Behance profile (Authority Score 21, [behance.net/Geloogetrz](https://www.behance.net/Geloogetrz), Miguel Angelo Gutierrez, the site's own developer, so not an independent link) and nine DesignRush directory pages (Authority Score 14 each, all nofollow): Top Australia Design Agencies page 3 · Top Digital Agencies in Australia page 5 · Top Digital Agencies page 75 · Top Australia Graphic Design Companies page 4 · Top Illustration Agencies in 2026 page 67 · Top Visual Communication Companies in 2026 page 69 · Top Automotive Branding Agencies in 2026 page 27 · Top Small Business Branding Agencies in 2026 page 152 · Top Startup Branding Agencies in 2026 page 91. Deep directory pages this far down pass almost no authority.
- **Social links on the page:** Facebook **found** (facebook.com/profile.php), YouTube **found** (youtube.com/@DesignBeesSubscriptions), LinkedIn **found** (linkedin.com/company/design-bees), Instagram **missing**, X **missing**.

Reading it: the on-page and technical basics pass. The score is dragged down by JavaScript interaction cost (INP 6.19 s and TBT 1.07 s against a 0.2 s target, performance 56/100), a link profile that is nine nofollow directory listings plus the developer's own Behance page, and two missing social links. The 20,439-word content count and the "pagehtmlembeds" keyword show Semrush is reading embedded script as page text, which also inflates the case-study carousel's share of the keyword density. Note the session's own attempts to run this tool failed Semrush's human-verification check (see Appendix I), so this run is AJ's.

Appendix B · HubSpot AI Search Grader

AI MENTIONS

ACTUAL

Tool: hubspot.com/ai-search-grader · run from this session on 10 Sep 2026 at 13:51 UTC · inputs: company "Design Bees", location "Australia", product or services "Unlimited graphic design subscription", industry "Marketing and Advertising" · result page. HubSpot describes the grader as a free one-time check across three LLM providers; the detailed report ("Unlock Insights") requires a HubSpot form and was not unlocked.

ENGINE	OVERALL (100)	BRAND RECOGNITION (20)	MARKET SCORE (10)	PRESENCE QUALITY (20)	B
ChatGPT (OpenAI)	43	4	5	7	
Perplexity	51	5	3	7	
Gemini (Google)	44	3	5	5	

How to read it. HubSpot weights sentiment at 40 of the 100 points, so a brand that is rarely mentioned but described positively when it is mentioned lands in the 40s. Design Bees scores 67–80% on sentiment and 0–40% on share of voice: when the engines talk about it they are kind, but they mostly do not talk about it. Brand recognition at 3–5 of 20 says the engines do not reliably know the brand without prompting. The three engines agree within eight points, so this is not a one-engine quirk.

The result page also lists, behind the unlock, sub-scores for recognition score, market position, brand archetype, confidence level, mention depth, source quality and data richness. These were not retrieved.

Appendix C · Semrush AI Visibility

AI MENTIONS

ACTUAL

C1 · Free AI Search Visibility Checker

Tool: semrush.com/free-tools/ai-search-visibility-checker · input www.designbees.com.au · run by AJ on 10 Sep 2026 · pasted as text. Covers ChatGPT, Gemini, Google AI Mode and Google AI Overviews.

MEASURE	VALUE	SEMRUSH'S NOTE
AI Visibility Score	0	"Low". Three-month trend not available: "We need more AI visibility history for this website before we can show a three-month trend."
Mentions	2	ChatGPT 0 · Gemini 0 · AI Mode 2 · AI Overviews 0
Citations	4	See cited pages below
Audience reach	458	Estimated audience reached through AI search

TOP CITED PAGES	CITATIONS
www.designbees.com.au/post/graphic-design-costs-in-australia-your-pricing-guide	2
www.designbees.com.au	1
www.designbees.com.au/how-it-works	1

BEST PERFORMING TOPICS	MENTIONS	TOPIC VOLUME
Unlimited Design and Decor Services	1	861
Custom T-Shirt and Design Services Australia	1	109

Competitor comparison (Semrush's default pick): graphicdesignacademy.com.au, AI Visibility Score 0, mentions 0, audience reach 0. No other competitor was entered.

On "not enough data": the score is a real 0, not a blank. Semrush ran its prompt sample and found Design Bees mentioned twice, both in Google AI Mode, and never in ChatGPT, Gemini or AI Overviews. What is unavailable is the trend line. The two topics it did appear for (home decor, custom t-shirts) are not Design Bees' market, which suggests the mentions came from broad "unlimited design" prompts rather than category prompts. The summary block showing "12.4K mentions, 3.8K citations, 1.2M reach, up 23%" on the same page is the AI Visibility Toolkit's sample promo, not Design Bees data, and is excluded here.

C2 · Semrush SEO Dashboard → AI Search widget (logged in, Australia)

Source: AJ's screenshot of the Semrush SEO Dashboard for designbees.com.au, AI Search panel, country selector "Australia", 10 Sep 2026.

PLATFORM	MENTIONS	CITED PAGES
ChatGPT	0	7
Google AI Overview	0	1
Google AI Mode	0	1
Gemini	1	2
Total	1	9

AI Visibility shown as **14** in this view. The dashboard and the free checker use different prompt samples and scopes (this one is Australia-scoped), which is why the numbers differ: 14 / 1 / 9 here versus 0 / 2 / 4 in the free tool. Both say the same thing: near-zero brand mentions, a handful of page citations, with ChatGPT citing pages without naming the brand.

Appendix D · Peekaboo

AI MENTIONS

ACTUAL

Tool: apeekaboo.com · brand "Design Bees" (id 261cc21a-ebca-4344-a587-ca121e946303), Australia, Agency & Marketing · read on 10 Sep 2026 through Peekaboo's MCP server at <https://www.apeekaboo.com/api/mcp>, after AJ created the free account and authorised it. Peekaboo runs each tracked prompt against a panel of engines and scores 0–100 on whether the brand appears in the answer and how prominently.

Read the window label carefully. Every figure below is returned under a "last 30 days" label, but the daily series holds a single day, 10 September 2026: all 40 runs executed at once when the account was created. The scores are real measurements. The "trend: up" flag Peekaboo returns is an artefact of having one data point, and there is no history to compare against yet. Peekaboo's own recommendation engine declined to suggest new prompts, reporting data quality 77 and needing more history. Re-reading this in 30 days is what turns these into a trend.

D1 · Visibility score, and the competitors Peekaboo tracks

BRAND	VISIBILITY (LATEST)	SAME DAY, 10 SEP	NOTE
Design Bees	56	56	40 runs across 5 prompts and 4 engines
ManyPixels	19	23	US, manypixels.co
Penji	17	19	US, penji.co
Design Pickle	20	17	US, designpickle.com
Kimp	4	10	Canada, kimp.io

Two columns because Peekaboo returns a "latest visibility" figure on the competitor list and a separate day-grain score on the time series; they agree for Design Bees and differ by a few points for the competitors. Either way the ranking is the same and the lead is wide.

What it means. On prompts that name Australia, Design Bees is chosen more often than the four subscription brands it is usually compared with, including Design Pickle. That directly contradicts the "AI visibility 0" headline from the free Semrush checker, and it is the single most encouraging number in this report. The caveat in D5 matters, though: these are five prompts we chose, not a neutral sample of what buyers ask.

D2 · By engine

ENGINE	MODEL SAMPLED	VISIBILITY	RUNS	AVERAGE POSITION
Perplexity	sonar	68	10	1.8
Google AI Overview	google-aio	60	10	1.0
Gemini	gemini-2.5-flash	49	10	1.2
ChatGPT	gpt-4o-mini	46	10	1.4
Google AI Mode	google-ai-mode	not sampled	0	—

The ordering matches every other source in this report: Perplexity and Google AI Overview are where Design Bees does well, ChatGPT and Gemini are where it does not. Average position is around 1 to 2 everywhere, so when the brand is named at all it is named early; the variable is whether it is named. **One caveat worth knowing:** Peekaboo samples ChatGPT as gpt-4o-mini, a small fast model, not the default model a buyer gets on chatgpt.com, so treat 46 as indicative of that tier rather than of the full product. Google AI Mode returned no runs, so Peekaboo adds nothing there and the Search Console Generative AI report remains the only reliable read on it.

Tested on 11 Sep. Live checks against the real ChatGPT (Appendix J) agree with Peekaboo on three of the four comparable prompts. The exception is the head category term, where Peekaboo scores ChatGPT 0 and the live product ranks Design Bees top through a Google Business Profile map pack. So this caveat holds narrowly: gpt-4o-mini under-reports answers driven by local and map results, rather than being unreliable across the board.

D3 · By prompt

PROMPT AS TRACKED	RUNS	SCORE	READING
How much does unlimited graphic design cost in Australia?	8	100	Named every time
Best unlimited graphic design subscription in Australia?	8	88	Strong
What is a Design Pickle alternative in Australia	8	51	Half the time, via others' listicles
Graphic design services (Australia)	8	40	Google only; ChatGPT and Gemini never
what do small businesses typically switch to when their freelance designer becomes too costly?	8	0	Never named, on any engine

Four of these five are the queries recommended in section 3 of the earlier draft, which AJ entered into Peekaboo. The fifth, the freelancer question, is Peekaboo's own auto-generated discovery prompt, categorised "Discovery Prompts" with intent INVESTIGATIONAL.

D3a · The two prompts worth looking at closely

ENGINE	"GRAPHIC DESIGN SERVICES (AUSTRALIA)" – SCORE	MENTIONS / RUNS	POSITION	"FREELANC
Google AI Overview	100	2 / 2	1	
Perplexity	60	2 / 2	3	
ChatGPT	0	0 / 2	—	
Gemini	0	0 / 2	—	
Overall	40	4 / 8	2.0	

These two rows are the report's clearest statement of the problem. On the head category term, Google's own surfaces put Design Bees at the top and the two chat assistants never mention it, which is exactly the 0/10 share of voice HubSpot measured on the same two engines (Appendix B). On the unbranded problem question, no engine names Design Bees at all: the answer buyers

get when they describe their situation rather than the product category is one Design Bees is absent from.

D4 · What the engines cite

Across the 40 runs Peekaboo logged **466 citations** spanning **250 URLs** on **109 domains**. Design Bees' own site is the single most-cited domain, with 68 citations and an influence score of 65.

DESIGN BEES PAGE CITED	CITATIONS	ENGINES
/ (homepage)	16	All four
/design-solutions/graphic-design	8	AI Overview, ChatGPT, Perplexity
/design-solutions/graphic-design-brisbane	6	AI Overview, Perplexity
/post/top-7-design-subscriptions-for-creative-teams-2026	5	AI Overview, Perplexity
Homepage, as a text-fragment deep link into the plan inclusions	3	Gemini
Homepage, with a ?utm_source=chatgpt.com parameter	3	ChatGPT
/design-solutions/graphic-design-sydney	2	Perplexity

Worth noting what is *absent*: the pricing-guide post, the top page in Search Console and the most-cited page in Semrush's AI checker, does not appear anywhere in Peekaboo's top 50 cited URLs, even though the cost prompt scored 100. The engines answered the cost question by citing the homepage and the services page instead. Different tools, different prompt samples; it is a discrepancy to watch rather than a contradiction.

THIRD-PARTY DOMAIN THE ENGINES CITE	CITATIONS	INFLUENCE	WHAT IT IS
manypixels.co	27	46	Competitor's blog, incl. "15 Best Design Pickle Alternatives"
reelunlimited.com.au	22	30	Australian competitor, not currently tracked
flocksy.com	21	43	"Best Australian Unlimited Graphic Design Companies"
digitalpolo.com	18	38	Comparison and alternatives posts
graphiker.com.au	18	36	Australian competitor, not currently tracked
reddit.com	16	42	Forum threads on Design Pickle alternatives and small-business design
google.com	13	40	Google's own surfaces
sourceforge.net	11	32	"Best Unlimited Graphic Design Services in Australia of 2026"
lumin.com.au	10	27	Australian competitor, not currently tracked
linkedin.com	10	41	Articles on design pricing
medium.com	8	28	Alternatives listicles
awesomic.com · magier.com	6 · 6	31 · 27	Comparison posts
ddiy.co · kimp.io	4 · 4	31 · 27	Alternatives listicles
g2.com · penji.co · shotkit.com	3 each	31 · 26 · 29	Review platform and comparison posts
quora.com · zyner.io · moonb.io · suur.io	2 each	26–30	Q&A and roundups

Two things follow from this table. First, the route into an AI answer for this category runs through other people's comparison posts and a handful of directories, and Design Bees appears in several of them already, which is why its scores are as high as they are. G2 shows up with 3 citations despite Design Bees having no claimed profile there, so claiming it is a cheap win. Second, the competitors Peekaboo is tracking are the wrong ones: the engines keep citing **Reel Unlimited** (which markets itself as "#1 Unlimited Graphic Design Services In Australia"), **Graphiker** and **Lumin**, all Australian, none tracked, while three of the four tracked brands are American. Also surfacing: Dweebi, Design Biscuit, Design Foundry, Talk Digital and Gold Coast Graphic Design.

D5 · Reconciling Peekaboo, HubSpot and Semrush

Three tools produced three different pictures on the same day, and the difference is not error, it is scope:

- **Peekaboo, 56 and leading.** Five prompts, four of them chosen by us, all naming Australia or a named competitor. This measures how Design Bees does *on the questions it is positioned for*, and the answer is well.

- **HubSpot, 43 to 51.** Its own generated prompt set for "unlimited graphic design subscription" in Australia, weighting sentiment at 40 of 100. It agrees that sentiment is good and share of voice is thin, and it agrees on which engines are weak.
- **Semrush free checker, 0.** A broad, unchosen prompt sample built from the domain. This measures how Design Bees does *on the whole category conversation*, and there the answer is barely at all: 2 mentions, and the two topics it surfaced for were home decor and custom t-shirts, neither of which is the business.

Both readings are true at once, and together they are more useful than either alone: Design Bees wins the Australian framing and loses the generic one. The freelancer prompt scoring 0 in Peekaboo is the bridge between the two, because it is the one prompt of the five that does not name Australia or a competitor, and it behaves like a Semrush prompt rather than a Peekaboo one.

Below the top 20: /10-day-free-trial 18 · /reviews 17 · /one-off-packages 15 · city pages Adelaide 11, Perth 11, Brisbane 6, Melbourne 6 · /how-it-works 9 · /post/graphic-design-services-in-sydney 8 · https://designbees.com.au/ (non-www variant) 6 · retired vertical pages /scale-up-businesses 10, /small-marketing-teams 6, /designbees-for-entrepreneurs 4, /it-services-professional-services 4 · /demo 2 · /blog 1. Page-level counts sum above the chart total because Google records an impression once per page shown in an AI response.

DEVICE	IMPRESSIONS	SHARE	COUNTRY	IMPRESSIONS	SHARE
Desktop	6,759	85.9%	Australia	6,867	87.3%
Mobile	1,072	13.6%	United States	228	2.9%
Tablet	34	0.4%	United Kingdom	126	1.6%
			Indonesia · Philippines · India · New Zealand	81 · 74 · 59 · 28	

Reading it. Google's AI features showed a Design Bees page about 85 times a day over the quarter, roughly one in eight of the site's web impressions. The pricing guide alone is 48% of it; with the homepage and the logo package, 82%. The curve rose through June and July to a peak the week of 20 July, then settled at 550–600 a week through August and early September, which is why the last 28 days are down 23%. The device mix is the reverse of ordinary search: 86% desktop, against 71% desktop for web clicks in August. The city pages, the Top 7 post and the service page barely register (19 to 134 impressions each). Four vertical pages the June fix list marked "merged, 301 to homepage, delete" and two non-canonical homepage variants are still collecting AI impressions. A check on 10 Sep found the four pages and the non-www variant do 301 to the canonical homepage, so this is Google still crediting old URLs, not a missing redirect; expect it to fade. The export gives no clicks and no queries, so it cannot say what people asked or whether they clicked; the "Search results" export (Queries tab) is the next input for that.

Context: on 3 Jun 2026 this property showed no AI dimension at all; the Generative AI report is new since then.

E2 · Performance → Search results, 3-month export (9 Jun – 8 Sep 2026)

Export from the domain property by AJ, file dated 11 Sep 2026 AEST, filters: search type Web, Last 3 months. Tabs: Dates, Queries (top 1,000), Pages (96), Countries, Devices, Search appearance. CSVs in docs/seo/data/gsc-search-results-2026-09-11/. The Queries tab holds 329 clicks and 34,289 impressions of the 930 and 65,504 totals; the rest is long-tail Google does not itemise.

PERIOD	DAYS	CLICKS	IMPRESSIONS	CTR
June 2026	22	192	13,842	1.39%
July 2026	31	328	24,428	1.34%
August 2026	31	302	21,305	1.42%
September 2026	8	108	5,929	1.82%
Total, 92 days	92	930	65,504	1.42%

Brand queries ("design bees", "designbees", "design bee" and variants): 212 clicks from 747 impressions, 64% of itemised clicks. Everything else: 117 clicks from 33,542 impressions, CTR 0.35%.

SEARCH APPEARANCE	CLICKS	IMPRESSIONS	CTR	POSITION
Product snippets	110	13,419	0.82%	15.4
Review snippet	1	9	11.11%	5.6

Product-snippet rich results are attached to a fifth of all impressions, which is why the Product-snippet warnings in E4 touch real traffic. No AI-feature search appearance exists for this property (the filter offers only Product snippets and Review snippet, checked 11 Sep).

E2a · Target terms, June baseline versus now

June figures are the 3 months to 3 Jun 2026 (Appendix F1); "now" is 9 Jun – 8 Sep 2026. Change is June position minus current position, so positive is an improvement.

QUERY	JUNE IMPR.	JUNE CTR	JUNE POS.	NOW IMPR.	NOW CLICKS	NOW CTR	NOW POS.
graphic design services	2,106	0.0%	10.6	1,787	4	0.22%	4.6
graphic design services australia	373	0.3%	8.1	365	1	0.27%	3.6
unlimited graphic design	381	0.3%	31.4	193	1	0.52%	18.6
graphic design subscription	191	0.0%	12.7	265	0	0%	24.1
unlimited graphic design services	176	0.0%	35.4	68	0	0%	24.6
design subscription	273	0.4%	25.8	212	0	0%	27.3
design subscription service	229	0.9%	25.8	58	0	0%	24.8
graphic design australia	238	0.8%	17.7	373	0	0%	11.1

unlimited design subscription	94	0.0%	52.8	3	1	33.33%	1.3
graphic design pricing	15	13.3%	3.4	14	0	0%	4.5

QUERY	JUNE IMPR.	JUNE CTR	JUNE POS.	NOW IMPR.	NOW CLICKS	NOW CTR	NOW POS.
how much does a graphic designer cost	19	5.3%	1.8	21	1	4.76%	1.7
graphic design membership	3	33.3%	2.3	—	—	—	not in export

Reading it. The head terms moved up hard: "graphic design services" from 10.6 to 4.6, "graphic design services australia" from 8.1 to 3.6, "unlimited graphic design" from 31 to 19, "best unlimited graphic design service" from 28 to 14. Click-through did not follow: the two biggest terms still convert under 0.3% of impressions from page 1, so the June-to-August work fixed rankings and left the snippet unsold. "graphic design subscription" went the other way, 12.7 to 24.1, which fits the keyword map's note that several pages still compete for it. The question queries that won clicks in June ("how much does a graphic designer cost", "graphic design pricing") still rank 1 to 5.

OTHER TERMS USED IN THIS REPORT	CLICKS	IMPRESSIONS	CTR	POSITION

TOP 20 NON-BRAND BY IMPRESSIONS	CLICKS	IMPRESSIONS	CTR	POSITION
graphic design services	4	1,787	0.22%	4.6
brand design	3	1,277	0.23%	17.5
branding design	1	901	0.11%	26.2
logo branding	0	532	0%	7.6
logo package	2	504	0.4%	7.0
design	0	417	0%	15.0
unlimited graphic design australia	1	390	0.26%	31.9
graphic design australia	0	373	0%	11.1
branding and logo design	0	372	0%	10.0
graphic design services australia	1	365	0.27%	3.6
branding package	2	346	0.58%	4.4
brand identity package	4	322	1.24%	4.7
graphic designing services	1	289	0.35%	4.8
graphic design subscription	0	265	0%	24.1
design services	0	250	0%	9.3
graphics design agency	0	230	0%	1.1
graphic design hourly rate	1	229	0.44%	13.1
logo design & branding	0	227	0%	16.9
logo and brand design	1	226	0.44%	13.3
branding and logo design packages	0	220	0%	9.0

Reading it. Outside the brand, impressions come from two clusters: the generic service head terms (services, agency, australia) and a logo-and-branding cluster ("brand design" 1,277, "branding design" 901, "logo branding" 532, "logo package" 504, "branding and logo design" 372, "branding package" 346, "brand identity package" 322) that the logo & branding package page and the logo post share. That second cluster is larger than the subscription cluster and mostly converts under 1%.

E2c · Question and AI-style queries

21 queries in the export end in "(for australia)" and together carry 482 impressions. Nobody types that suffix; it is the form Google's AI Mode uses when it fans a question out into sub-searches. These rows are the query-level trace of the Generative AI impressions in E1: the site ranks first or second for most of them, with no clicks recorded against any.

QUESTION-FORM AND AI-STYLE QUERIES, TOP 18 BY IMPRESSIONS	CLICKS	IMPRESSIONS	CTR	POSITION

/design-solutions/motion-graphics	3	855	0.35%	27.6

The fourth row is the **http://** homepage recorded as its own page with 10.6K impressions, 57 clicks and position 5.4: Google is treating the http URL as a separate indexed page. The session could not test the http redirect (its proxy carries HTTPS only); Ahrefs lists one HTTP-to-HTTPS redirect. Either way the canonical tag and the redirect should both point at <https://www.designbees.com.au/>, and URL inspection in Search Console will show which canonical Google has chosen.

DEVICE	CLICKS	IMPRESSIONS	CTR	POSITION
Desktop	692	54,295	1.27%	12.8
Mobile	235	10,936	2.15%	9.5

Philippines	39	527	7.4%	9.9
United States	22	5,038	0.44%	8.7
India	16	710	2.25%	11.9
Switzerland	14	46	30.43%	4.4
Pakistan	12	193	6.22%	9.1

E3 · Performance → Search results, monthly (Google performance emails)

MONTH	CLICKS (WEB)	IMPRESSIONS (WEB)	PAGES WITH FIRST IMPRESSIONS*	DESKTOP / MOBILE / TABLET
June 2026	253	18.4K	19	
July 2026	328	24.4K	3	
August 2026	299	21.3K	9	

*Google's estimate. Image and video search clicks were 0 in all three months. Google also sent a "300 clicks in 28 days" milestone on 1 Aug 2026 (period ending 30 Jul).

MONTH	TOP PERFORMING PAGES (CLICKS)	TOP GROWING PAGES (CHANGE VS PREVIOUS MONTH)
June	Homepage 112 · pricing-guide post 64 · logo & branding package 26	logo & branding package +9 · homepage (http://) +4 · /post/graphic-design-services-in-australia +3
July	Pricing-guide post 110 · homepage 104 · logo & branding package 55	pricing-guide post +46 · logo & branding package +29 · /one-off-packages +4
August	Pricing-guide post 121 · homepage 85 · logo & branding package 33	pricing-guide post +11 · XV Premium case study +5 · Pappa Flock case study +3

MONTH	TOP PERFORMING QUERIES (CLICKS)	TOP GROWING QUERIES (CHANGE)
June	design bees 57 · designbees 12 · design bee 5	design bees +7 · design bee +2 · graphic design surry hills +2
July	design bees 58 · designbees 15 · brand identity package 2	designbees +3 · graphic design subscription services +2 · graphic design services +2
August	design bees 36 · designbees 11 · freelance graphic designer hourly rate australia 2	cheap branding packages +2 · freelance graphic designer hourly rate australia +2 · graphic designer cost +2

Reading it. Impressions rose 33% from June to July and fell 13% in August; clicks followed (253 → 328 → 299). Brand queries fell from 73 clicks in July to 47 in August while the pricing-guide post kept growing, so the August dip is mostly brand demand, not content. Mobile is 24–29% of clicks. Australia is 76–84% of clicks; Philippines and India traffic is likely the team and job-seekers, not buyers.

22 Mar 2026	New indexing reason on /our-work/ property: "Page with redirect"	Portfolio URLs redirecting.
3 Jun 2026	"Improve Google presence": domain property designbees.com.au verified	Site-wide data starts here.
30 Jun 2026	New owner: miguel@designbees.com.au added	Web developer has owner access.
1 Jul 2026	Product snippets structured data issue detected (1); validation started	Product schema added in June had a missing field.
3 Jul 2026	Product snippets issue fixed (validated) · Review snippets issue detected (1) · new indexing reason "Redirect error"	One fixed, one new schema warning, and a redirect misconfiguration on some URL.
6 Jul 2026	Validating Page indexing fixes ("Not found")	404 clean-up from the June fix list being checked.
17 Aug 2026	New indexing reason: "Alternate page with proper canonical tag"	Some URLs now point their canonical elsewhere; expected after the vertical-page consolidation, worth confirming the pages intended.
6 Sep 2026	Page indexing issues fixed for /our-work/ property (validated)	Portfolio indexing clean.
7 Sep 2026	Merchant listings structured data issue detected (1)	Offer schema on a product page missing a field.
9 Sep 2026	Merchant listings issues (4): missing <i>availability</i> , <i>hasMerchantReturnPolicy</i> , <i>shippingDetails</i> (in offers), no global identifier (gtin, brand) · Product snippets issues (3): missing <i>review</i> , <i>availability</i> , <i>aggregateRating</i>	All flagged non-critical today; Google notes such issues can be reclassified as critical. For a service business, Merchant-listing fields (shipping, returns) suggest a Product/Offer schema type that may be the wrong type for the packages; consider Service + Offer instead.

Appendix F · June baseline: query table and AI-engine audit

SECONDARY

Two spreadsheets produced on 3 Jun 2026 from the newly verified domain property and a manual audit. Older than the September tools above; the query table is now superseded by the 3-month export in Appendix E2 and is kept for the before-and-after comparison there. Sources: Design Bees AEO – GSC Review – 2026-06-03 · Design Bees AEO Visibility Audit – 2026-06-03.

F1 · Search Console, 3 months to 3 Jun 2026 (714 clicks, 53.1K impressions, CTR 1.3%, average position 12.5)

how much does it cost to hire a graphic designer	Question	1	4	25.0%	1.0
graphic design membership	Category	1	3	33.3%	2.3

F2 · Manual AI-engine audit, 3 Jun 2026 (five prompts, three engines)

PROMPT	PERPLEXITY	GOOGLE AI OVERVIEW	CHATGPT (LOGGED IN, WEB SEARCH)
What is the best unlimited graphic design subscription in Australia?	Named top pick; cited (1 of 8 sources). \$545 correct.	Named first, #1 in "Top Australian-based subscriptions"; cited; also organic #1.	Not mentioned. Named ManyPixels, Penji, Kimp, UnicornGO.
How much does unlimited graphic design cost in Australia?	Cited as a source, not named in prose.	Cited (#2 source); quoted range \$545–\$2,645 is Design Bees' plan span; not named.	Listed 2nd; cited; A\$545–A\$2,645 correct.
How does an unlimited graphic design subscription work?	Not mentioned (generic answer).	Not mentioned (generic answer).	Not mentioned (no web search).
Design Bees review	Positive; cited. Caveat: reviews sourced from own site.	Positive; cited; wrong price: "from around \$900/month" (entry plan is \$545).	Positive; cited. States founded 2024 (unverified).
Design Bees vs Design Pickle	Positive fit for Australian buyers; cited.	Boutique Australian service; cited (with YouTube, Reddit, SourceForge).	Comparison table; cited via Slashdot and SourceForge; founding year 2023 (inconsistent).

Pattern in June: strong on Perplexity and Google AI Overview for the "best in Australia" prompt, invisible on ChatGPT for the same prompt, and absent everywhere for the neutral "how does it work" prompt. Guest-mode ChatGPT did not recognise the brand at all. The September tools (HubSpot share of voice 0/10 on ChatGPT and Gemini; Semrush 0 ChatGPT mentions) are consistent with this.

Appendix G · Ahrefs and SearchAtlas monitoring

SECONDARY

G1 · Ahrefs Site Audit

SEO SCORES

Source: scheduled crawl emails from sa@ahrefs.com, project "Designbees" · app.ahrefs.com/site-audit/9577405. The free crawl covers only 3–4 internal URLs, so the health score describes those pages, not the site.

CRAWL DATE	URLS ANALYSED	HEALTH SCORE	ERRORS	WARNINGS	NOTICES
26 Aug 2026	4	94	1	4	2
2 Sep 2026	3	94	1	3	2
9 Sep 2026	3	93	1	3	2

Top issues on 9 Sep: HTTPS page has internal links to HTTP (1 URL, the error); 3XX redirect (2); redirected page has no incoming internal links (1); redirect chain (1); HTTP to HTTPS redirect (1); page and SERP titles do not match (1). The HTTP internal link was first flagged in the June fix list as the footer "Book a time / Let's chat" link to http://designbees.com.au/demo and marked a false positive then; Ahrefs still sees one.

G2 · SearchAtlas LLM Visibility and OTTO

AI MENTIONS

Source: weekly emails from noreply@searchatlas.com and hello@searchatlas.com · LLM Visibility dashboard.

- **27 and 31 Aug 2026, LLM visibility for designbees.com.au:** "4 new pages cited by AI": /design-solutions/graphic-design-sydney 13 mentions, /one-off-jobs-packages 1, /one-off-packages 1, /post/the-benefits-of-subscription-based-design-services-for-startups 1.
- **Competitor tracking in the same account:** designpickle.com climbed to #19 in AI visibility (27 Aug, up 14) and had 10 new pages cited (30–31 Aug); designjoy.co #52 (31 Aug); thevisualcollective.com.au 4 new pages cited (31 Aug).
- **1 Sep 2026, OTTO weekly performance:** impressions 2,741 → 1,316 week on week (–1,425); organic traffic 31 → 22; organic keywords 753 → 871 (+118); 3 "new content" fixes deployed. SearchAtlas's own tracking, not Search Console.
- **Account status:** SearchAtlas reported a failed payment on 28 Aug ("your service will soon be canceled") and LinkGraph downgraded the plan to Free on 1 Sep. These emails may stop. No action taken in this report, per the no-paid-plans rule.

Appendix H · Live site check, 10 Sep 2026

SEO SCORES

ACTUAL

Fetched from this session with curl after network access was opened: sitemap index, page and blog sitemaps, robots.txt, and 30 individual URLs (status code, robots meta, JSON-LD block count, approximate visible word count, title).

- **Sitemap index** lists 11 child sitemaps: pages (38 URLs), blog posts (23), blog categories, case studies, client-times, logging-a-job, and five FAQ collections.
- **robots.txt** allows everything except member and operational areas (/my-account, /design-portal, /design-job-status, /new-design, /plans-pricing) and Wix lightbox URLs. AdsBot is explicitly allowed.
- **Homepage:** title "Unlimited Graphic Design Subscription Australia | Design Bees"; meta description 149 characters; 2 JSON-LD blocks; about 1,750 visible words; HTML weight 2.4 MB.
- **City pages** live for Sydney, Melbourne, Brisbane, Perth and Adelaide under /design-solutions/graphic-design-{city}, each about 920–945 words with one JSON-LD block and the title pattern "Graphic Design Services {City} | From \$545/mo | Design Bees". Sydney returned 502 once, then 200 twice.

URL	STATUS	ROBOTS META	JSON-LD	WORDS	NOTE
/pricing-cards	200	—	1	461	Pricing page; short copy for a money page.
/how-it-works	200	—	2	1,091	Cited by Semrush AI.
/10-day-free-trial	200	—	1	442	
/demo	200	—	0	346	No schema on the booking page.
/design-solutions/graphic-design	200	—	1	817	Title "Unlimited Graphic Design on a Simple Monthly Plan"; no location or price in the title.
/design-subscriptions-for-construction	200	—	0	227	Thin, indexable. June fix list said merge and delete.
/design-subscriptions-for-manufacturing	200	—	0	228	Thin, indexable. Same.
/options-to-scale-design	200	—	0	230	Thin, indexable; June list: "add content or noindex".
/affiliate-library	200	—	0	162	Thin, indexable.
/faq-general	200	—	0	367	No title tag returned.
/frequently-asked-questions	200	—	0	228	"Members Frequently Asked Questions"; three FAQ hubs now exist.
/general-frequently-asked-questions	200	—	0	228	/faqs 301-redirects here. No FAQPage schema detected in the HTML.
/videofolio	200	—	0	298	
/client-portfolio	404	—	0	—	Deleted in June; returns a 404 page, not a redirect to /our-work.
/staff-dashboard	200	noindex	0	757	Correctly noindexed.
/pricing-plans/plans-pricing	200	—	0	3	Wix checkout page; blocked in robots.txt.
/post/your-title-what-s-your-blog-about	200	—	1	933	Placeholder post still live and in the sitemap ("Welcome to Design Bees: Your Hub for Creative Inspiration").
/post/graphic-design-costs-in-australia-your-pricing-guide	200	—	2	1,177	Title "Graphic Design Prices in Australia: 2026 Cost Guide".
/post/top-7-design-subscriptions-for-creative-teams-2026	200	—	2	3,215	Longest page on the site.

URL	STATUS	ROBOTS META	JSON-LD	WORDS	NOTE
/one-off-packages/logo-and-branding-package	200	—	1	915	Third-biggest page by clicks; likely carrier of the Product/Merchant schema warnings.
/reviews	200	—	1	1,133	Google AI Overview quoted "\$900/month" from this page in June; confirm the \$545 entry price is explicit.
/about	200	—	0	1,053	No Organization schema in the HTML; June list had this "working on it".

Proposed URLs checked and confirmed absent (404): /design-pickle-alternative-australia, /temporary-graphic-designer-cover-australia, /post/temporary-graphic-designer-cover-australia, /post/design-subscription-vs-freelancer-vs-agency-vs-in-house.

Appendix I · Method, access and sources

What was run, where, and what blocked

INPUT	RUN BY	OUTCOME
Semrush SEO Checker	AJ, logged in	Received as screenshots, then as pasted text with exact figures. The session's own runs (twice, headless Chromium) failed Semrush's "we couldn't verify that you're human" check.
Semrush AI Search Visibility Checker	AJ, logged in	Received as text, plus the dashboard AI Search widget as a screenshot. Same human-verification failure from the session.
HubSpot AI Search Grader	This session	Completed without an account. Full report not unlocked.
Peekaboo, browser onboarding	This session	Stopped at "Create free account & run it" (step 4 of 5).
Peekaboo, MCP server	AJ authorised, session queried	Completed. AJ created the free account and signed in to aipeekaboo.com/api/mcp ; the session then read visibility, model breakdown, prompts, competitors, cited URLs and top sources directly. All 40 runs are dated 10 Sep 2026.
Search Console, Generative AI report	AJ, export	Received as Search Console's CSV export (zip, dated 11 Sep 2026 AEST), last 3 months, impressions only. No connector was available; Supermetrics's Search Console source was unauthenticated and its trial expired.
Search Console, Search results export (Queries, Pages, Dates, Search appearance)	AJ, export	Received as Search Console's CSV export (zip, dated 11 Sep 2026 AEST), last 3 months, via the teleported terminal session. CSVs in docs/seo/data/gsc-search-results-2026-09-11 .
Search Console, monthly and alert emails	Gmail connector	Read directly from Google's emails to aj@designbees.com.au .
Live ChatGPT and Google AI Mode checks of six queries	AJ's machine, teleported session	Completed 11 Sep 2026 from an Australian connection, after Google served its "unusual traffic" bot check to the cloud session's datacentre IP. A first capture pass produced three false negatives; every affected result was re-tested with a corrected method. See Appendix J0.
Live site fetches	This session	curl after the environment's network access was changed from Trusted to Full at about 13:33 UTC; before that every audit domain and the site itself were blocked by the egress policy.

No paid plans were started, nothing on the website was changed, and no credentials were used beyond the Gmail and Google Drive connectors already attached to this session.

Appendix J · Live engine checks AI MENTIONS ACTUAL

Six buyer queries run on 11 Sep 2026 (AEST) from AJ's own machine and Australian connection: ChatGPT in a signed-in browser session, and Google AI Mode via `google.com/search?udm=50&hl=en-AU&gl=au`. This is the check the cloud session could not perform, because Google served its "unusual traffic" challenge to the datacentre IP. Four readings from the first pass were later found to be false negatives and were re-checked before anything here was relied on; see J0.

J0 · A correction, and what it means for reading this appendix

The first capture script was unreliable, and this appendix was wrong before it was corrected. It read each page after a fixed delay rather than waiting for the answer to finish generating, so a slow response was recorded as an empty one, and an empty one was scored as "brand not mentioned". **Four readings were affected**, every one a false negative: the cost and best-subscription queries on ChatGPT, and the cost and freelancer queries on Google AI Mode. All four actually **do** name Design Bees. An earlier draft of this appendix concluded from the first three that Peekaboo's ChatGPT score was "inverted" against the real product. That conclusion was wrong and has been withdrawn.

The fault only ever ran one way: a truncated read can invent an absence, but it cannot invent a brand mention. So every negative from the first pass has since been re-checked, and the positives were left as recorded. Three were re-tested by script, using a method that waits for ChatGPT's stop-generating control to disappear and then requires the answer to hold steady across four consecutive polls, twice per query. The fourth, the freelancer query on Google AI Mode, was run by hand (`docs/seo/data/live-ai-checks-manual-2026-09-11.md`). After that sweep exactly one negative survives: ChatGPT on the freelancer query.

What this appendix is and is not. One or two runs per query, on one day, from one account and one location, with personalisation and location both in play. It is not an average. Its value is the opposite of Peekaboo's: Peekaboo repeats prompts across models to give a comparable score over time, while this shows the actual words, prices and links a buyer receives.

J1 · The scoreboard

QUERY	PEEKABOO	CHATGPT, LIVE	GOOGLE AI MODE, LIVE
Best unlimited graphic design subscription in Australia	88	Present, ranked #1 in both runs. "Best overall for Australia", A\$545–\$2,645. re-tested 2/2	Present, ranked "Best Overall Local Choice".
How much does unlimited graphic design cost in Australia?	100	Present in both runs, quoting \$545–\$2,645 incl GST correctly. re-tested 2/2	Present and the lead source, same price range. re-tested
Graphic design services Australia	40 ChatGPT 0	Present, top of a local map pack, "\$545/month incl. GST".	Present, but below agency lists sourced from Clutch.
Graphic design services Sydney	not tracked	Present, "Surry Hills", \$545 inc GST, dedicated designer.	Present in the map pack, beside Made Agency, Design Fox and 55 Knots.
What is a Design Pickle alternative in Australia?	51	Present but ranked 5th, below ManyPixels, Penji, Kimp and Flocksy, with no price given.	Present and listed first among Australian alternatives.
What do small businesses switch to when a freelance designer gets too costly?	0 AI Mode not sampled	Absent in both runs. No provider named at all, no citations. re-tested 0/2	Present. Named as a provider, and the most-cited source in the answer. manual run
Total naming Design Bees	—	5 / 6	6 / 6

J2 · How the live picture compares with Peekaboo

Once the false negatives are removed, the two mostly agree, which is reassuring for both:

QUERY	PEEKABOO	LIVE CHATGPT	AGREE?
Cost in Australia	100	Present, 2/2	Yes
Best subscription in Australia	88	Present, 2/2, ranked #1	Yes
Freelancer too costly	0	Absent, 0/2	Yes
Graphic design services (Australia)	0 (ChatGPT)	Present, top of map pack	No

One genuine discrepancy remains, and it is instructive. Peekaboo scores ChatGPT 0 on the head category term while the live product puts Design Bees at the top. The likely cause is the one flagged in Appendix D2: Peekaboo samples ChatGPT as gpt-4o-mini, which has neither the live retrieval nor the local map results the consumer product uses, and this is precisely the query the live answer resolves through a map pack. So the caveat in D2 holds, but narrowly: **Peekaboo under-reports answers that are driven by local and map results**. It is not wrong across the board, and on three of four comparable prompts it matches the live product.

J3 · What ChatGPT cites when it does name Design Bees

Across four verified runs, ChatGPT cited `designbees.com.au` every time. Two pages did the work:

- `/` the homepage, cited in all four runs
- `/post/are-unlimited-graphic-design-services-truly-limitless-what-you-need-to-know`, also cited in all four

That second page is worth noting: it does not appear anywhere in Peekaboo's top-50 cited URLs (Appendix D4), yet it is half of ChatGPT's evidence base for both commercial queries. Alongside it ChatGPT cited `graphiker.com.au/pricing`, `digitalpolo.com` and `kimp.io`. The rivals it names alongside Design Bees are Graphiker, DigitalPolo, Kimp, Design Pickle and Flocksy, so the Australian competitor set identified in D4 is confirmed on the live product.

J4 · The freelancer question: lost on four engines, won on the fifth

This query was checked by hand after the automated capture misread it (J0). The result splits by engine:

ENGINE	RESULT	EVIDENCE
ChatGPT	Absent, and no provider named at all	2 of 2 verified runs, zero citations
Gemini · Perplexity · AI Overview	Absent	Peekaboo, 8 runs, score 0
Google AI Mode	Present, and the most-cited source	Manual run, 11 Sep

Peekaboo's 0 does not contradict the AI Mode win, because Peekaboo never sampled AI Mode: it logged 0 runs on that engine (D2). The two measurements cover different surfaces.

The most useful detail is which page won it. Google AI Mode built its answer largely from `/post/cannot-afford-a-full-time-designer-here-are-your-options`, citing it five times, more than any other source including Reddit. The content that answers this question already exists and already works. The problem is reach, not absence: that page is invisible to ChatGPT, Gemini, Perplexity and AI Overview. The action is to extend and interlink it, not to commission something new.

Two cautions. Even in the win, Design Bees is framed as a "local regional option" after "global platforms like Penji, Design Pickle, and ManyPixels", despite being the source the answer is built on. And on ChatGPT the query names *nobody*, describing the models generically and citing nothing, so that surface is uncontested rather than lost to a rival, which makes it cheaper to win than a term competitors already hold.

J5 · Two levers this check surfaced that the rest of the report missed

- **Google Business Profile drives the location answers.** Both engines returned a map pack for the Australia and Sydney queries, with "Design Bees - Unlimited Graphic Design, 5.0, Surry Hills" as a map entity rather than a web result. That is the Business Profile, not the website, and it is the reason ChatGPT ranks Design Bees top on the head term where Peekaboo scores 0. Both engines also displayed it as "Closed" at the time of asking, so hours are being read and shown to buyers.
- **Clutch is cited by both engines and there is no claimed profile.** AI Mode led its Australia answer with Clutch directory pages, and ChatGPT cited Clutch's Sydney page. The report already recommended claiming Clutch on general principle; this is direct evidence for it.

J6 · An under-defended slot: capped, fixed-price projects

Google AI Mode's answer to the freelancer question offered four alternatives: design subscriptions, DIY tools, offshore outsourcing, and **capped project-based contracts**. That fourth option is the thinnest-sourced part of the whole answer, resting on a single LinkedIn post cited twice, where every other section drew on Reddit, industry blogs and designbees.com.au. The engine described it as fixed, predefined cost for a defined package, with "no hidden hourly billing surprises".

Design Bees already sells this and does not say so in that language. /one-off-packages/custom-jobs is live and its meta description already promises a "custom, flat-rate graphic design quote", but the page is titled "Request a Custom Graphic Design Quote". It leads with the internal framing, a custom quote, rather than the buyer's framing, a capped price that cannot blow out.

SEARCH CONSOLE QUERY, 9 JUN – 8 SEP	IMPRESSIONS	CLICKS	POSITION
flat rate graphic design	25	0	—
how do graphic design service pricing models work in australia, hourly vs ...	17	0	—
flat rate graphic design services	12	0	—
freelance graphic design rates per project	8	1	—
graphic design rates per project	5	0	—

An honest verdict. As an SEO play this is small: roughly 67 impressions and a single click across three months. As an AI-citation play it is more interesting, because the slot exists in the answer, it is poorly defended, and the service already exists so nothing has to be built. The cheap test is to re-word the existing page in the engine's vocabulary — capped, fixed fee, defined scope, no hourly surprises — rather than commission anything, then re-run the freelancer query in 30 days and see whether the fourth section starts citing Design Bees instead of a LinkedIn post.

Renaming the product itself is a commercial decision, not an SEO one, and is left to AJ; the page can be re-worded to match buyer language whether or not the product name changes.
